

How to determine which version of EasyTrade/Extract for Windows you are running

The version of the application you are running can be determined by the following steps:-

- Click on the windows 'start' button in the bottom left hand corner
- Go to 'All Programs → Extract for Windows → Database' and launch this application. (If this option is not available you may find it under 'All Programs → Kewill Systems Plc → Database')
- From the menu select the 'Help → About' option
- A screen similar to the below will be displayed. In this case the version number is 3.7
