1. Summary of release

=====

SPXPc-40 Intrastat changes - Supplementary Units reporting for 2012

2. Installation information

=====

!!! AS WITH ALL SOFTWARE RELEASES, PLEASE TAKE A BACK UP OF YOUR SYSTEM BEFORE APPLYING THIS HOT FIX. !!!

To apply the Hot Fix, ensure that no one is using SPEX.

If you have any queries or questions regarding the installation / upgrade procedure for your organization you should contact your Kewill representative before proceeding.

To apply the Hot Fix, ensure that no one is using SPEX and unzip the HotFixPC40.zip file into the root folder of your SPEX installation.

3. Hot Fix Information

=====

SPXPC-40

-----

The list of Commodity Codes requiring supplementary units to be shown on the Intrastat report has been updated for 2012. The previous codes for 2011 have been removed.

Note: The printing of previous years' Intrastat reports may possibly cause warnings to be generated because of the changes to the codes.
